

Description

An art of Metallizing means coating of very thin metal layer on the plastic film as a substrait under high vacuum conditions. These films are used in manufacturing of MPP type Film Capacitors which are used in various applications in the industry.

Technical Specifications

Metallizing Profile	3 layers (Al-Zn-Al)
Web size	500 mm
Metals	Aluminium – Zinc – Aluminium
Operating Vacuum	1.5×10^{-3} mbar
Film Thickness	4 micron To 12 micron
Types of Films used for Metalizing	Biaxially Oriented Polypropylene Film, Polester, Paper.
